Medical examiner treated inexcusably

I am writing in support of Dr. Ali Hameli, our former medical examiner. The way in which he was treated was inexcusable. No one deserves to be dismissed publicly with no reason given, no explanation offered.

How sad to see 30 years of such distinguished service to our state overlooked and for him to be dismissed with no due process of the law.

Having known Dr. Hameli and his family for some years, I attest that he is a kind and generous man of impeccable manners. I have heard him speak on several occasions regarding his work on some well-known forensic pathology cases. His love for his work is obvious.

It is my hope that this dismissal will be thoroughly investigated and that Dr. Hameli will be vindicated and allowed to return to the medical examiner's office to continue the excellent work to which he has devoted his life.
